Unit Title:	Carry Out A Basic Cycle Safety Check
Unit Level:	Entry 3
Unit Credit Value:	1
GLH:	7
LASER Unit Code:	WJI084
Ofqual Unit Code:	A/652/4687

This unit has 7 learning outcomes.

Learning Outcome (The learner will):		Assessment Criteria (The learner can):	
1.	Know the main parts of a cycle.	1.1	Identify the main parts of a cycle including: • wheels and tyres • the handlebars • brakes • chain / chains.
2.	Be able to check that the tyres are inflated correctly.	2.1	Demonstrate a tyre air pressure check.
		2.2	Locate the manufacturer's information about tyre pressure.
3.	Be able to show that the brakes are working.	3.1	Demonstrate that the brakes are working.
		3.2	Demonstrate that brake levers are within reach operation.
4.	Be able to show that the chain is in good working order.	4.1	Check that the chain is oiled.
		4.2	Check the chain for snags and stiff links.
5.	Be able to check that the handlebars are fitted correctly.	5.1	Demonstrate that the handlebars are secure.
6.	Know that the cycle is the right size.	6.1	Identify if the cycle is the correct size and fit for self.
7.	Know about the range of assistance available to undertake a basic cycle safety check.	7.1	Identify the range of assistance available to check: • an air pressure • brakes • a chain • handlebars.

Assessment Guidance:
Current legal and regulatory frameworks and guidance as well as accepted good practice must be applied to the delivery of this unit. The range of assistance can include a cycling assistant as well as equipment.
