

Unit Title: Working With Electrical Circuits
Unit Level: Entry 2
Unit Credit Value: 3
GLH: 30
LASER Unit Code: WJB280
Ofqual Unit Code: D/503/3963

This unit has 3 learning outcomes.

LEARNING OUTCOMES		ASSESSMENT CRITERIA	
The learner will:		The learner can:	
1.	Know basic principles of electrical circuits.	1.1	Identify the components used in simple electrical circuits.
		1.2	Identify simple circuits in which electricity can flow.
		1.3	State some energy changes taking place in an electrical circuit.
2.	Know how to use electricity safely.	2.1	Identify some hazards associated with the use of electricity.
		2.2	Suggest some ways to reduce risks when using electricity.
3.	Be able to work with electrical circuits.	3.1	Build simple working circuits.
