

Unit Title: Fish And The Aquatic Environment
Unit Level: Level 1
Unit Credit Value: 5
GLH: 45
LASER Unit Code: WJC335
Ofqual Unit Code: D/506/0998

This unit has 4 learning outcomes.

LEARNING OUTCOMES		ASSESSMENT CRITERIA	
The learner will:		The learner can:	
1.	Know common aquatic flora and fauna lifecycles.	1.1	Identify three flora and three fauna in an aquatic environment.
		1.2	Describe the life cycles of given aquatic flora and fauna.
2.	Know the principal characteristics of water.	2.1	Outline the water cycle.
		2.2	Collect water samples from a given freshwater habitat in a safe manner.
		2.3	Analyse water properties of a given aquatic environment.
3.	Be able to compare different common aquatic environments.	3.1	Contribute to the safe collection of aquatic invertebrates from flowing or still water.
		3.2	Identify the differences in aquatic flora and invertebrates found in contrasting aquatic environments.
4.	Know common fish species and their requirements.	4.1	Identify common saltwater, coarse and salmonid fish.
		4.2	Identify the external and internal features of a named fish species.
		4.3	Describe the needs of a named fish species.
