

**Unit Title:** Valves, Taps And Cisterns In Domestic Plumbing  
**Unit Level:** Level 2  
**Unit Credit Value:** 3  
**GLH:** 24  
**LASER Unit Code:** WJD535  
**Ofqual Unit Code:** J/505/0739

This unit has 4 learning outcomes.

| LEARNING OUTCOMES |                                                                          | ASSESSMENT CRITERIA |                                                                                  |
|-------------------|--------------------------------------------------------------------------|---------------------|----------------------------------------------------------------------------------|
| The learner will: |                                                                          | The learner can:    |                                                                                  |
| 1.                | Understand the construction and operation of domestic taps.              | 1.1                 | Explain the function of the components in a range of domestic taps.              |
|                   |                                                                          | 1.2                 | Diagnose common faults in a range of domestic taps.                              |
|                   |                                                                          | 1.3                 | Rectify the faults identified.                                                   |
| 2.                | Understand the construction and operation of float and isolation valves. | 2.1                 | Explain the function of the components in a range of float and isolation valves. |
|                   |                                                                          | 2.2                 | Diagnose a range of common faults in float and isolation valves.                 |
|                   |                                                                          | 2.3                 | Rectify the faults identified.                                                   |
| 3.                | Understand the construction and operation of a domestic toilet cistern.  | 3.1                 | Explain the function of the components in types of cisterns.                     |
|                   |                                                                          | 3.2                 | Diagnose common faults in types of cistern.                                      |
|                   |                                                                          | 3.3                 | Rectify the faults identified.                                                   |
| 4.                | Understand the need for water storage in a domestic system.              | 4.1                 | Explain why water needs to be stored in a domestic system.                       |
|                   |                                                                          | 4.2                 | Explain how and where this is done.                                              |
