

Unit Title:	Keeping Safe In A Marine Environment
Unit Level:	Level 3
Unit Credit Value:	2
GLH:	8
LASER Unit Code:	WJH182
Ofqual Unit Code:	F/650/0331

This unit has 3 learning outcomes.

LEARNING OUTCOMES		ASSESSMENT CRITERIA	
The learner will:		The learner can:	
1.	Understand the role of risk assessment for outdoor learning in an outdoor marine environment.	1.1	Define the terms 'hazard' and 'risk' with reference to outdoor learning in a marine environment.
		1.2	Classify hazards and risks in a marine environment that could cause harm to people.
		1.3	Explain ways to mitigate identified risks.
2.	Be able to carry out a site risk assessment and a risk-benefit assessment in an outdoor marine environment.	2.1	Conduct appropriate risk assessments for outdoor learning sessions in a marine environment.
		2.2	Balance risk against benefits of outdoor learning in a marine environment.
		2.3	Carry out a site risk assessment related to an activity.
		2.4	Carry out a risk-benefit assessment related to an activity.
3.	Be able to plan emergency procedures applicable to outdoor learning in a marine environment.	3.1	Produce an emergency action plan specific to own marine site.
		3.2	Produce a missing person procedure.

Assessment Guidance:

LO 2: Create a minimum of two different risk assessments for a marine site and for an activity undertaken at the site referring to the Health and Safety Executive's guidance.

Risk assessments should include marine site-specific issue such as tides, currents, cliffs, marine wildlife etc. as appropriate.
