

Full online Healthcare Diploma for September 2019

We are developing a fully online **Access to HE Diploma in Healthcare Professions** which will be available for use from September 2019. This course will provide the opportunity to enrol learners on a 100% distance learning course. The course however remains in the control of the Access team in your centre who will be able to act as online tutors and assessors. LASER will externally moderate the students' work in the usual way.

Where a course is delivered either entirely, nearly all, via distance learning, a college/Access centre will be required to submit a short approval application to LASER to demonstrate that there are the proper resources in place to support this type of provision. 45 Credits must be chosen as graded from the Academic Subject list below and a further 15 may be chosen as ungraded credits from both the Academic Subject and Study Skills lists below.

Further details and guidance for offering the online diploma from September 2019 will be published soon.
